

I have xm satelite radio...And my opinion of this..is that right now their is other things a whole lot more important than this petty stuff..I pay for the service with my hard earned money...The services that xm provide..expecially the traffic and weather is very helpful..it tells you what to look for and what the traffic conditions are..please reject the NAB's petition 04-160..I fully Suppoert XM Radio....we need to focus on Gas prices at the momment..lol
